

F-SERIES Polypropylene

Fast Maintenance Double Diaphragm Pumps

F-SERIES Polypropylene

- Sizes from ½” to 3”
- Available with 7”, 10”, 12” or 14” diameter diaphragms
- Machined from solid billets of material, supported by metal air domes, top and bottom plates and through studs, offering safety without compromising fast maintenance.
- **Only “ONE-NUT” to access diaphragms with the pump ‘in-line’**
- **Only four nuts and bolts to access the balls valves**
- **Only four bolts to maintain air valve with pump ‘in-line’**
- Normally for solvents/chemicals and dyes and often as a less expensive option for stainless steel.
- Screwed, hygienic or flanged connections
- Maximum temperature 80°C
